

**NOTICE FROM VOLKSWAGEN GROUP CANADA INC.  
REGARDING APPROVED EMISSIONS MODIFICATION**

The nationwide settlement to resolve consumer claims in Canada related to the 2.0-litre diesel emissions matter has been approved by the courts.

Beginning on April 28, 2017, and until September 1, 2018, Canadian settlement class members and U.S. customers of Volkswagen and Audi 2.0-litre TDI vehicles that were first sold or leased in Canada may submit claims for eligible benefits under the settlement.

The settlement provides cash payments to eligible current and former owners and lessees. Many of these customers who continue to have their vehicle may also have the option of (1) keeping their vehicle and receiving, at no charge, an emissions modification that is approved by regulators, OR (2) for owned vehicles, a buyback or trade-in, OR (3) for leased vehicles, early lease termination.

You are receiving this notice because you will be having the approved emissions modification performed on your vehicle at an authorized dealership.

You could be receiving the emissions modification if your claim in the settlement was approved and you selected the modification as your benefits option. If this does not describe your situation and you think your vehicle is among the vehicles covered by the settlement, please note that:

After April 28, 2017, if you have the emissions modification, including the first phase of the modification in the case of a model year 2015 vehicle, performed on your vehicle, you will eliminate any right that a current owner/lessee of the vehicle may have to choose a buyback, trade-in or early lease termination under the settlement. In that case, the current owner/lessee will retain any right to receive a cash payment, as well as the second phase of the modification in the case of a model year 2015 vehicle, under the settlement.

**“I have read and received a copy of this Notice Regarding Approved Emissions Modification”**
