

**NOTICE FROM VOLKSWAGEN GROUP CANADA INC.
REGARDING APPROVED EMISSIONS MODIFICATION FOR
VW AND AUDI 3.0-LITRE DIESEL (TDI) VEHICLES WITH GENERATION 1
ENGINES**

The nationwide settlement to resolve consumer claims in Canada related to the 3.0-litre diesel emissions matter has been approved by the courts.

Beginning on May 8, 2018, and until May 31, 2019, settlement class members of Volkswagen, Audi and Porsche 3.0-litre diesel vehicles that were first sold or leased in Canada may submit claims for eligible benefits under the settlement. If the claim is approved, the benefits must be collected by August 31, 2019.

The settlement provides cash payments to eligible current and former owners and lessees. Those customers who continue to be in possession of their 3.0-litre Generation 1 diesel vehicle can (1) keep their vehicle and receive, at no charge, the emissions modification approved by U.S. regulators for their vehicle, or alternatively, they may have the option of (2) a buyback or trade-in if they own their vehicle, or (3) an early lease termination if they lease their vehicle.

You are receiving this notice because you will be having the approved emissions modification performed on your vehicle at an authorized dealership.

You could be receiving the emissions modification if your claim in the settlement has been approved and you selected the modification as your benefits option. If this does not describe your situation and you think your vehicle is among the vehicles covered by the settlement, please note that:

If you have the emissions modification performed on your vehicle, you will eliminate any right that a current owner/lessee of the vehicle may have to choose a buyback, trade-in or early lease termination under the settlement. In that case, the current owner/lessee will retain any right to receive a cash payment under the settlement for completing the emissions modification.
